

Why I Believe in God and True Science

- 1.** Law of Biogenesis- life arises only from existing life, which must be of the same biological species, without exception. Scientifically proven by Louis Pasteur, Francesco Redi, Lazzaro Spallanzani. Ultimately, life sprang from the Living God: In the beginning God created **Genesis 1:1 John 1:1-3**
- 2.** The Law of Cause and Effect (Causality)- Proves that everything that exists has an Ultimate Cause. It must be immaterial, otherwise it would be subject to the same laws of decay (entropy) as the universe, and then the cause itself would have to have a beginning. The origin must therefore be of an immaterial/ spiritual, outside our universe of space-matter-time: God!
- 3.** First law of the. Thermodynamics (the law of conservation of energy) The total amount of mass energy in the universe is constant. Creation is a past event and no longer continues.
- 4.** Second Act of the. Thermodynamics (Law of Entropy) – The amount of workable energy decreases, in other words, the entropy increases to a maximum. Everything tends to decay, not evolution.
- 5.** Laws of Nature – If there is a law then logically there is also a Lawgiver.
- 6.** Laws of logic point to a Lawgiver.
- 7.** The incorporeal, spiritual things that transcend the material – Reasons, love, goodness, conscience, morality, consciousness, beauty, natural laws, etc. These transcend matter. Therefore, there must be a disembodied, transcendent Designer God who expresses thoughts through words: **John 1:1-3; Colossians 1:15-16.**
- 8.** The spiritual does not arise from the material, but vice versa –In the beginning God created **Genesis 1:1** Everything was made by the Word: **John 1:1-3; Colossians 1:15-16; Hebrews 11:3; Psalm 1:1-3 and 33:9.**

9. Evidence for the coexistence of humans and dragons/dinosaurs – Thousands of written records of dragons/dinosaurs and man-made artifacts (statues, pictures) that were found, including their bones, soft tissue and even blood. The term "dinosaur" was not invented until 1841 by Sir Richard Owen (before these animals were called “dragons” or “monsters”). The Bible also clearly speaks of such animals.

10. SOMETHING can never come from NOTHING by NOTHING

11. There is no known law of nature, no known process, and no known sequence of events that can cause information of its own to arise in matter.” – Dr. Werner Gitt.

12. Order can never come from chaos.

13. Coincidence Impossible - The impossibility that life and things and the universe came into existence by chance.

14. Evolution cannot show experiment. Observational science does not lack experiment.

15. Evolution is not observable, not testable, not repeatable, not falsifiable.

16. Evolution goes against common sense. Common sense distinguishes the difference between chance and created order . She looks at creation and realizes that there must be a Creator.
Romans 1:18-22.

17. Natural Selection – Adapt to survive: interaction with the environment. It is a top to bottom process, NOT a bottom to top process. Her limit is that she cannot create new species. After all, it is only a selection of what already exists.

18. Lack of Transitional Fossils – despite the suggested many “millions of years”.

19. Irreducible Complexity: all life possesses irreducible complexity: the removal of one component causes the system to stop functioning.
The fossil record supports this.

20. Common Design – Similar design in different creatures by the same Designer.

21. Over-Design (more than necessary) – Design features that go beyond what is necessary for survival.

22. Added Beauty- See, for example, the peacock's tail feathers. Not necessary to survive.

23. The stunning complexity of things – The macro world and the micro world, the genome, brain, etc.

24. Finely tuned universe- The overwhelming level of precision in our entire active universe is indescribable. This cannot have happened by chance.

25. Morality – Without a moral standard we only have our own opinions (opinion versus opinion).

26. The cell- Far more advanced than any technology any human can create.

27. Symbiotic Relationships- Simultaneous inter-dependency for functionality.

28. The Human Body— Stunning in its design, error correction, self-healing, muscle strengthening through use, the brain: the most complex arrangement of matter in the universe

29. Consciousness – With knowledge; not having enough of physical world; concerns more than the physical world; is spiritual, immaterial, hidden in and using the brain; is concretely yours; controls the body and its senses.

30. The human conscience - God consciousness.

31. Genetics – Is like software; works with extreme precision. Can't possibly arise by accident.

32. Design – Technology that we as humans TRY to imitate for example

wings, microphone, camera, memory cards, radar, velcro, aerodynamics, etc.). Design indicates a Designer.

33. Evidence Before the Flood-- Fault lines; mountains and valleys; hundreds of accounts of a worldwide flood that bear a resemblance to the biblical account of the flood, across cultures and nations, including the reporting of a family, ark, animals, and the destruction of the rest. The sizes of the ark give sufficient space for the selected species of animals, and also give a good seaworthiness in proportion.

34. Prophetic, Biblical Evidence- Hundreds of strictly biblical prophecies, fulfilled in great detail hundreds of years after their descriptions of kingdoms rising and falling, the Messiah and His life, birthplace, miracles, suffering, betrayal and death, in great detail.

35. The Level of Influence Jesus Christ Had- Despite massive and great persecution, torture, death, of many early Christians.

36. Historical Evidence –
History supports the truth of the Bible account: there is no evolution.
